

aMail Signs VAR Agreement with AXSionics AG, to Become Global AXSionics partner.

Ottawa, Ontario – September 12, 2008 – Effective immediately, aMail Inc's (aMail) name has been changed to aTrust Inc. (aTrust). aTrust provides leading edge, identity-verified, secure online access systems and secure, encrypted, identity-verified, electronic mail for the e-Health, e-Banking and e-Government markets.

“Although a-Mail our secure electronic mail product will be the key Company product, changing the Company name to aTrust will better help define the Company's role,” said Michel Duron, VP Sales and Marketing.

“Today governments of all stripes are offering many online services to citizens, while in the health care industry electronic health record access will soon be made available to citizens online, and lastly it is expected that banks will offer enhanced online access services to eliminate fraud and protect their customer's against identity theft,” added Mr. Duron

Focusing on identity-verified e-authentication, aTrust's user-centric e-Authentication & Credential System allows a FlickerCard owner to fully control and manage his/her identity within a local or federated identity environment.

About aTrust Inc.

aTrust Inc. is a private Canadian company that has developed patented electronic mail software that will allow a user to send, and a receiver to receive, secure, encrypted, and identity-verified electronic mail. aTrust products also utilize biometric identity-verified login, using FlickerCard a privacy enhanced, biometric token, for remote access to Internet portals, computers, and computer networks.
